

PIONEER

WINDOW & DOOR MFG.

Hopper Window

- Robust Concealed Hinges systems do away with the old-style bulky face mounted type of swing hinges.
- Ergonomic Sash Locking Systems.
- Constant force coil balances hold the window open. Non-friction-based system that will last a lifetime. Easy to operate. Unlock the window, open it up and it stays up.
- No interference between Jamb Extensions, and Casing. Low ceiling that comes right to the window will not interfere with the hold open system. Other designs require the window to go past 90 to lock into the hinges our window does not.
- Egress Sizing Available. 30 x 30, 36 x 26, 38 x 24, are common egress sizes. Custom size also available for egress or non egress.
